**Project Leads**
- Corrin McMichael, MPH, Deputy Director, Whitman County Public Health
- Meghan Johns, Community Health Educator, Whitman County Public Health

**Data Collection & Analytics**
- Janessa Graves, PhD MPH, Public Health Data Analyst

**Report Writing**
- Kelly Fonteijn, Lead Writer
The purpose of this report is to:

- Ensure Whitman County residents, businesses, agencies, and community-based organizations have up-to-date public health data as we all work together to improve our county’s health & well-being.
- Highlight new and creative ways community members address Whitman County’s top health needs.
- Give an update on progress toward meeting our community’s needs; these were captured in WCPH’s 2022 Community Health Needs Assessment (CHNA).

**Community Health Needs Assessment**

You can find WCPH’s 2022 CHNA by visiting WhitmanCountyPublicHealth.org, navigating to the Community Health Division, and selecting our Community Data Program. You can read the full report or a quick synopsis of the report.

**This report includes:**

A **Health Snapshot** comparing Whitman County’s Health and Wellness Measures. The Health Snapshot shows year-over-year data so that we can see trends.

**Priority Needs Data** and **Community Initiatives** on the community’s top needs, as identified in the 2022 CHNA.

- Mental & Behavioral Health
- Standard of Living
- Preventive Care

Wishing our community health & wellness,

Chris Skidmore
DIRECTOR

Corrin McMichael
DEPUTY DIRECTOR
Our mission is to protect & improve the health & wellbeing of Whitman County.
Health Snapshot

The Health Snapshot is a small selection of Leading Health Indicators, or what we call Health Goals, to show how Whitman County’s health and wellness compares to Healthy People 2030 targets.

Sometimes we do not have a data source that aligns with Healthy People 2030 measures. In such cases, we use alternative data for “apples-to-oranges” comparison. Look out for these symbols as indicators.

What is Healthy People 2030?
Healthy People 2030 is a federal initiative to promote, strengthen, and evaluate the nation’s efforts to improve the health and well-being of all people. WCPH chose to use Healthy People 2030’s Leading Health Indicators, or what we call Health Goals, in part due to their setting of targets for each indicator through data-driven approaches that are transparent and repeatable.

- You can view more information about the Target-Setting Methods developed by the National Center for Health Statistics (NCHS) at health.gov/healthypeople, then navigate to the “Data Sources and Methods” section under the “Objectives and Data” dropdown.

What are Health Goals?
Leading Health Indicators included in the Healthy People 2030 initiative are high-priority objectives selected by the federal Office of Disease Prevention and Health Promotion.

- These objectives show a direction in which trends need to move for positive change; for example, “Reduce cigarette smoking.” In this case, numbers going down over time indicate positive health change. Leading Health Indicators are the same everywhere in the country.
- All years marked N/A indicate data that has not been measured or is still being collected.

Mental & Behavioral Health

Mental and behavioral health is a top community health need. The 2022 CHNA highlighted the need for improvements in the following areas:

### Mental Health Conditions & Suicide
- Suicides per 100,000 population (Death Certificate Data)

### Access to Mental & Behavioral Health Providers
- Percentage of people on Medicaid with a mental health care need who received mental health care treatment (WA HCA)

### Alcohol, Prescription, & Illicit Drug Use
- Percentage of Medicaid beneficiaries prescribed chronic opioids and a concurrent chronic sedative (WA HCA)
Spotlight on Community Initiatives
Mental & Behavioral Health

These new initiatives show our community’s passion for improving Whitman County's mental health.

Resilient: A Whitman County Taskforce

Resilient is a grassroots initiative and a Whitman County task force working to cultivate a stronger and more tightly-knit Whitman County. It is comprised of individuals from all corners of Whitman County. Our team includes community leaders, fire/EMS personnel, law enforcement officers, educators from primary and higher education, mental health professionals, healthcare experts, faith-based community leaders, members of the agribusiness community, and representatives from the public and private sectors. Our mission is to build resilient communities, educate and empower members to address mental health issues early, provide effective interventions during crises, and support after a suicide.

For more information and to discover how you can lend a helping hand in our community, visit Resilient’s newly developed website at resilientwhitman.org

Pullman Parks & Recreation QPR Courses

Pullman Parks and Recreation offers a variety of classes for both Pullman residents and non-residents, including the lifesaving QPR training course. QPR, or Question, Persuade, and Refer, are three simple steps that anyone can learn to help save a life from suicide.

Just as people trained in CPR or the Heimlich Maneuver can help save thousands of lives each year, people trained in QPR learn how to recognize the warning signs of a suicidal crisis and how to question, persuade, and refer someone to help.

Pullman Parks and Recreation's QPR courses are taught by Charice DeGuzman, a certified mental health counselor and certified QPR instructor. Classes are open to anyone 18 years and older, costing $10 for residents and $12 for non-residents.
Priority Need Data

Standard of Living

Access to housing, child care, food, and living wage jobs are all social determinants of health that impact how long Whitman County residents live, and the quality of our lives.

### Poverty

**Percentage of families with children under 18 living below poverty level (ACS 5-year data)**

- **Whitman County**: [Graph showing trend]
- **Washington State**: [Graph showing trend]

**Percentage of older adults (65+) living in poverty (ACS 5-year data)**

- **Whitman County**: [Graph showing trend]
- **Washington State**: [Graph showing trend]

**Percentage of households receiving Food Stamps/SNAP in the last 12 months (ACS 5-year data)**

- **Whitman County**: [Graph showing trend]
- **Washington State**: [Graph showing trend]

### Housing

**Percentage of children in public schools who are homeless (OSPI Report Card)**

- **Whitman County**: [Graph showing trend]
- **Washington State**: [Graph showing trend]

### Child Care

**Median cost of care at childcare centers for toddlers (licensed center) as percentage of median income (Child Care Aware of WA)**

- **Whitman County**: [Graph showing trend]
- **Washington State**: [Graph showing trend]
Spotlight on Community Initiatives

Standard of Living

These initiatives showcase our community’s creativity as we address top health needs.

Council on Aging

Council on Aging has proudly served Whitman County residents since 1976, with programs ranging from nutritional programs to transportation services. Council on Aging has been crucial in improving the quality of life for many Whitman County residents for decades.

Run mainly by volunteers, the Council on Aging’s nutritional programs range from food distribution to area food banks, weekly congregate meals for senior citizens across the county, to daily home-delivered meals for senior citizens. Council on Aging aims to meet residents where they are by providing these services in the majority of outlying rural towns of Whitman County.

Another program the Council on Aging offers is COAST Transportation, which provides safe and reliable transportation to support rural mobility needs in Whitman County. There are no income or age qualifications for Washington residents to use COAST. COAST also has vehicles available to help accommodate wheelchairs and power scooters.

Affordable Small Homes Pilot

Affordable and available housing is highlighted as a top priority need in WCPH’s 2022 CHNA. Avista, Community Action Center, and the University of Idaho’s Architecture program have joined forces to imagine together an eco-friendly, affordable “small home” community in Rosalia. The project is in its initial design and feasibility planning stage.

The development may include six small homes at about 750 square feet each, a greywater-irrigated community garden, and a playground. With sustainability in mind and to lower energy impact, the homes will be warmed/air conditioned by a community-level geothermal heat pump, with hot water from a community solar pavilion. This possible development pilot will boost homeownership, as residents will own their homes.

Community Action Center owns the land in Rosalia; UI is carrying out architecture & design; and Avista is contributing expertise, technical equipment, and support around sustainable energy.
Priority Need Data

Preventive Care

Preventive care saves lives. Unfortunately, Whitman County residents are less likely than other Washingtonians to get preventive care such as checkups, and cancer screenings.

Cancer Screenings & Treatment

- Percentage of Medicaid members 50–75 years of age who had appropriate screening for colorectal cancer (WA HCA)
- Percentage of female Medicaid beneficiaries, 50–74 years of age who had a mammogram during the measurement year (WA HCA)
- Percentage of women 21–64 years of age who were screened for cervical cancer (WA HCA)

Routine Checkups

- Percentage of Medicaid beneficiaries, 3–21 years of age, who had at least one comprehensive well-care visit (WA HCA)
- Percentage of fee-for-service (FFS) Medicare enrollees with an annual wellness visit (CMMS)

Childhood Immunizations

- Percentage of kindergarteners with kindergarten immunizations complete, (Kindergarten Overall Compliance Status)
Spotlight on Community Initiatives

Preventive Care

These projects help Whitman County residents age well, boost cancer screening rates, and increase well child checks.

Pullman Regional Hospital Cancer Screenings

Pullman Regional Hospital and its network of clinics are committed to catching cancer early through cancer screenings for breast, cervical, colorectal, lung, prostate, and skin cancer. Implementing standardized patient rooming (age-based/risk-factor-based screening review) during annual primary care appointments helps patients stay current with essential cancer screenings.

Patients can schedule their yearly mammogram screening at Pullman Regional Hospital without a referral; exams are usually covered by insurance.

School-Based Health Checks

Throughout August 2023 Community Health Association of Spokane (CHAS), Pullman Regional Residency Center, and Whitman County Public Health partnered to offer head-to-toe check-ups, including sports physicals, vision screenings, and growth checks, to all interested school districts in our county.

Aging Well: Whitman Hospital & Medical Clinics SAIL Fitness Classes

Falls in older adults are the leading cause of injury, hospitalizations, and fatalities in the United States. SAIL (Stay Active & Independent for Life) classes stave off inactivity in the aging population, reduce the risk of falling, and offer a place where community members can engage and feel a sense of community well-being.

WHMC has offered SAIL to the community since 2008. It is a strength and balance class for adults 65 and older but is open to all adults in the community. All classes are taught by a certified SAIL instructor.

Classes are offered on the following dates and times:

- Colfax Hill Ray Plaza: Mondays and Wednesdays at 10:00 am
- Colfax The Center: Tuesdays and Thursdays at 10:30 am
- Endicott Lutheran Church: Mondays at 11:30 am and Fridays at 9:30 am
- LaCrosse The Meeting Place: Tuesdays and Thursdays at 9:00 am
- St. John Community Building: Tuesdays and Thursdays at 1:00 pm
PRESENTING THE
2023 Annual Impact Report
