WHITMAN COUNTY PUBLIC HEALTH'S COMMUNITY IMPACT REPORT

AVAILABLE NOW | READ THE QUICK SUMMARY BELOW

- ▶ WIC
- ▶ Immunizations
- ▶ TB Testing
- ▶ Safe Kids

INFANTS TO ELDERS

Whitman County Public Health is enhancing community health with free immunizations and TB testing, alongside nutrition and food assistance through WIC. We also offer breastfeeding support and health screenings. Safety is a priority with initiatives like medicine lockboxes, free helmets, safe home kits, and child car seats, ensuring young families have the resources to thrive.

Life, Loss, & Longevity

- Local Data
- Birth & Death Certificates
- Reducing Harm from Substance Use
- Disease Prevention
- Resource Navigation

We are at the forefront of bolstering community well-being, providing crucial local health data and resources for disease prevention. We ensure essential life events are officially recorded, offering timely birth and death certificates. Our Palouse Resource Guide empowers residents with resources for various health and social services. Furthering our commitment to public safety, we implement harm reduction strategies to address substance abuse.

CLEAR WATERS SAFE DINING

**Hazard
Preparation**

**Town-Specific
Water Quality Data**

**Food Inspection
Scores**

Whitman County Public Health is actively supporting environmental health by preparing the community for potential hazards. The department shares specific water quality data for each town, helping residents make knowledgeable choices about their water sources. Additionally, they provide updated food inspection scores for local food facilities, ensuring public awareness of sanitation and safety practices. These steps by Whitman County Public Health contribute to safeguarding the community's health and its natural resources.
